PROJECT L.O.V.E. VOUCHERS NOW PART OF E-CITATION PROGRAM

Project L.O.V.E. (Law Officer Voucher & Enforcement) vouchers are now being issued in conjunction with the e-citation program, which allows participating law enforcement agencies to print tickets electronically. Effective September 29, 2014, any officer who issues a child passenger law citation (IC 9-19-11-2 and IC 9-19-11-3.6) through the e-citation system will automatically print a Project L.O.V.E. voucher.

Drivers who are issued vouchers can redeem them at local child safety seat inspection stations, where they will be provided with a child restraint (if deemed necessary by the certified child passenger safety technician) and education on proper use and installation. Although it is the driver’s decision to redeem the voucher, they are encouraged to do so because the judge and/or prosecutor may take it into consideration when determining the driver’s fine. A first offense fine may be waived by the court if documentation from the inspection station is provided by the driver.

The Automotive Safety Program will still provide printed copies of the vouchers to law enforcement officers who do not participate in the e-citation program. The vouchers will also continue to be issued to offenders by a select number of traffic courts.

Please contact Marnita Louzon at 1.800.543.6227 or mllouzon@iu.edu with any questions regarding this program.
Making a Difference

Ann Gallagher, CPST from the Carmel Police Department, received the following note from a grateful parent:

“Thank you again for checking my children’s car seats this morning.
I can’t tell you how much I appreciate this service and knowing that the kids are safe while we are traveling!!

Thank you for all you do for our community!

Child Safety Seat Inspection Stations

During the fourth quarter of the 2013-2014 grant year (July – September) Indiana’s network of child safety seat inspection stations reported a total of 2,362 inspections and distributed 982 car seats to children in need. In addition, 54 Project L.O.V.E. vouchers were redeemed.

Thanks to all those involved, a total of 8,496 inspections were completed through our network of child safety seat inspection stations during the 2013-2014 grant year!

Visit www.preventinjury.org for a complete listing of Indiana’s child safety seat inspection stations.

Please contact Marnita Louzon at mllouzon@iu.edu or 1.800.543.6227 if you are interested in establishing a child safety seat inspection station.
PLEASE NOTE: Effective December 22, 2014, the Automotive Safety Program will have a mailing address change, so please make note of this change and send all correspondence to:

Automotive Safety Program
Fesler Hall, Rm. 207
1130 W. Michigan Street
Indianapolis, IN  46202

CPS grants available – The Automotive Safety Program is offering a limited number of mini-grants for car seat clinics during Oct. 1, 2014 through Sept. 30, 2015. You can apply for up to $500 in car seat funding for clinics throughout the year. The mini-grants are offered on a first-come, first-serve basis and are issued on a reimbursement basis. If you are interested in applying for car seat clinic funding through the Automotive Safety Program, please contact April Brooks at apbrooks@iu.edu or 317-274-8380. Also, the Manufacturer’s Alliance for Child Passenger Safety (MACPS) has a limited number of education grants available for agencies and organizations that conduct CPS programs. These grants can be used to purchase items from Safe Ride News, SafetyBeltSafe, Huggable Images or Innovative Concepts to enhance and support education efforts of technicians and caregivers. All applications must be submitted electronically on or before January 16, 2015. Awardees will be notified the week of February 20, 2015. You can find the application and additional information about this grant at www.saferidenews.com/srdnn/.

Spanish materials are now available for certification courses through Safe Kids Worldwide. Any bilingual technician candidate who registers for a CPS certification or renewal course will now have the option to have their technician guides and quizzes in Spanish to assist candidates who might prefer written materials in a native language. The courses will still be taught in English. For more information on getting a colleague registered for a CPS course or if you are interested in hosting a course at your facility, please contact April Brooks at apbrooks@iu.edu or 317-274-8380. To register for a CPS class, visit http://cert.safekids.org.

Tech Tidbits! (cont’d)

CPSTs need to pay close attention to any inspection of a Britax Marathon ClickTight or a Britax Boulevard ClickTight convertible seat to make sure the harness straps are fully engaged. Consumer Reports recently discovered when they bought two Britax ClickTight convertibles (Marathon and Boulevard) that both sides of the harness strap had not been fully secured to the lower anchor hook. The harness is still secured at several other points on the car seat, but there could still be a risk if the harness were to come loose at that particular point on the child restraint. If you discover this issue on any of the Britax seats you come across, it is easy for you to fix yourself. Be sure to read the instructions for adjusting the harness length. Britax also has a video on their website which demonstrates how to adjust the harness. You can find this video at www.britax.com. Always be sure to check the entire child restraint for issues prior to installation.

For any Dorel car seat manufactured since January 2014, the expiration dates have been extended, except for the Incognito booster, which still has a six year expiration date. The new rear-facing only and convertible models have an eight year expiration and the Pria, combination seats, 3-in-1s, and BPBs expire after 10 years. This change is not retroactive. It is always important to follow the date on the particular car seat to find the appropriate expiration date. This update is for the whole Dorel line, which includes, Cosco, Safety 1st, Eddie Bauer, and Maxi-Cosi. For more information about expiration dates and other CPST resources, visit Dorel’s website at www.djgusa.com.

At the Kidz in Motion Conference in New Mexico in August, 2014, the bucklebopper was introduced by MiiG Enterprises. The bucklebopper is designed to release safety seat buckles with ease for people with hand pain issues. This device allows car seat buckles to be opened without using fingers or thumbs. The product is available for $14.99 before tax. To watch a tutorial or to learn more about this product, visit www.bucklebopper.com.
Recently, Pro Consumer Safety released guidelines for parents on how to safely transport children when using a recreational vehicle (RV). The purpose of these guidelines is to provide parents alternative ways to consider traveling with children in an RV. A fact sheet was created for child passenger safety professionals. The fact sheet briefly describes the different classes of RVs, FMVSS, overall injury risks among rear passengers, guidelines for parents, and seat belt concerns and existing crash tests. To get a copy of the fact sheets, visit: http://www.procarseatsafety.com/uploads/3/4/1/7/3417234/fact_sheet_rv__child_occupants_2014.pdf.
For specific questions about the fact sheet or to speak with someone about RV safety, contact James DeCarli at proconsumersafety@gmail.com or 323-491-6197.

RESEARCH

With the support of the General Motors Foundation, Safe Kids Worldwide recently released a research report where they surveyed 1,000 parents with children ages 4 to 10 years to find out how their children ride in car seats and what leads them to use a booster seat or seat belt. The report noted that 7 in 10 parents didn’t know that a child should be at least 4’9” before moving out of a booster seat into a seat belt. Of those surveyed, 86 percent of parents moved their child into a seat belt prior to the recommended height.

NEWS ARTICLES OF INTEREST

On October 31st, in Vigo County, a woman was killed and her two children were injured in a crash on I-70. The mother crashed into the back of a tractor-trailer in a construction zone. Her 13 year old son sitting in the front passenger seat suffered leg and internal injuries and the 19 month old child in a car seat suffered internal injuries, but they both survived the crash. Trooper Michael Featherling said of the accident, “The use of a car seat is directly responsible for saving the life of the infant passenger.” To read more about this story, visit http://wibqam.com/news/articles/2014/nov/01/mother-killed-two-children-and-one-truck-driver-injured-in-i-70-accident/.

On Dec. 2, 2015, a fatal school bus crash took the lives of two children and one adult in Knoxville, TN. Two school buses collided, causing one to overturn. To read more about this story, visit: http://abcnews.go.com/US/school-buses-crash-injuring-dozen-tennessee/story?id=27317162.
CEU OPPORTUNITIES

In January 2015, a new edition of the LATCH Manual will be available, along with a revised quiz for technicians to take to earn CEUs toward recertification. Currently, the new quiz is not available, but keep checking the SafeRideNews website for the update. To order a LATCH Manual or to earn a CEU by taking the quiz, visit: http://saferidenews.com/srndnn/CPSTsProfessionals/RecertificationCEUsfromSRN/tabid/92/Default.aspx.

NEW VIDEOS AND PSAS

Recently, IMMI released a new PSA that demonstrates a 35 mph frontal crash test of an adult holding an 18 month old child in their lap. The video shows the child hit the seat in front of them and then pass over the back seat. Visit https://www.youtube.com/watch?v=fzbCeVQqrxA&feature=youtu.be to view this PSA.
NEW PRODUCTS

Urbini Petal Touri Rear-Facing Only Travel System
- Rear-facing: 4-35 lbs. and up to 32”
- Preemie insert for infants 4-6 lbs.
- 4 harness slots
- 2-position base recline foot
- Built-in lock-off
- Side impact tested
- Car seat weighs less than 8 lbs.
- Car seat in Touri System not interchangeable with car seat in Omni System
- MSRP: $149.00
- http://urbinibaby.com

Urbini Petal Omni Rear-Facing Only Travel System
- Rear-facing: 4-35 lbs. and up to 32”
- Preemie insert for infants 4-6 lbs.
- 4 harness slots
- 2-position base recline foot
- Built-in lock-off
- Side impact tested
- Car seat weighs less than 8 lbs.
- Car seat in Omni System not interchangeable with car seat in Touri System
- MSRP: $199.00
- http://urbinibaby.com
NEW PRODUCTS (CONT’D)

Recaro Performance Coupe Rear-Facing Only
- Rear-Facing: 4-35 lbs. and up to 32”
- Temperature balanced fabric
- Side impact protection
- Twist-resistant HERO harness technology
- No re-thread harness
- 5 harness height positions
- 2 buckle positions
- Removable cover for cleaning
- MSRP: $249.99
- www.recaropromotion.com

Jané Montecarlo R1 Booster
- Booster: 30-100 lbs.
- Lower anchor attachments
- Adjustable backrest
- Water resistant
- Side impact tested
- MSRP: $190.00
- www.jane-usa.com
Evenflo Company, Inc. (Evenflo)
   – Model: Embrace 35 rear-facing only CR equipped with an AmSafe QT1 buckle

- Affected model numbers include:
  30711365  31511040  46811205  48111200  48411391  52911307A  55311138
  31511323  46811237  48111215  48411391D  52921040  55311238
  31511400  48111215A  48411392  52921040  55311292
  3151198   48111218  48411504
  3151953   48111234  48411504D
  31521138  48111235
                   48111235A
                   48111462

- Manufacture dates are various times from December 2011 through May 2013.
- Over time, use of the seat can make the harness buckle difficult to unlatch.
- A buckle that does not release easily, or possibly at all, may make it difficult to remove the child from the restraint, increasing the risk of injury in the event of a vehicle crash, fire, or other emergency, in which a prompt exit from the vehicle is required.
- Evenflo will notify registered owners and provide the remedy kit, including a replacement buckle and instructions for easy consumer removal of the AmSafe buckle and installation of the newly-designed replacement buckle.
- Owners may contact Evenflo’s toll-free number at 1-800-490-7591 or visit their website at www.embracebuckle.evenflo.com.
